

Job Title: Product Manager

Job Location: Ajax, ON

Job Field: Business Team

Employment Type: Full time/Permanent

Besnovo (formerly BRIC Engineered Systems) is a leading system integrator in industrial robotics and automation and has a track record of developing sophisticated robotic solutions and systems for the aerospace, automotive, and advanced manufacturing industries. Besnovo's robotic and automation products have been successfully deployed for worldwide customers, include the US Air Force and leading aerospace companies.

Besnovo is seeking a dynamic, passionate, and results-orientated individual to manage the development of robotic laser de-coating products for aircraft. This position is responsible for creating strategies and roadmap, requirements elicitation, feature definition, competition analysis, and marketing. The successful candidate will report to the President and work with Besnovo's engineering, business, and procurement teams. The candidate may be often required to provide project updates and strategic changes to President.

Responsibilities:

- Responsible for creating market and competition analysis, product delivery strategies, requirements definition, feature prioritization, and logical sequencing.
- Create, monitor and assess the progress of feature implementation, and make adjustments appropriately to meet customers' timelines.
- Liaise with and support customers through all phases of product development.
- Support Business Team with strategic plans to capitalize on market opportunities.
- Support and as required oversee the product approval processes. Schedule governance reviews and provide product documentation as required.
- Manage any security and export approvals during the shipping processes.
- Develop strong understanding of the aircraft MRO industry and continuously seek knowledge of our collaborators, suppliers, customers, and competitors for developing Besnovo's product vision.

Qualifications:

- Bachelor or Masters in Business, Engineering or related field
- 3-5 years previous experience in Product Management or Business Analyst
- Strong strategic thinking and business analytical skills
- Thrives in fast-paced entrepreneurial environment
- Superior ability for time-management, multitasking, and organizing information
- Superior communication skills (verbal, interpersonal and written)
